

Working on how to import the list from the data.txt file into the temperature column in my timetemp TABLE.

```
root@kenny:/srv/http
<html>
  <head>TestDB</head>

  <body>
    <h1>RANDOM</h1>
    <?php
      $host = 'localhost';
      $user = 'root';
      $pass = 'root';
      $db = 'testDB';
      $table = 'timetemp';

      mysql_connect($host, $user, $pass) or die(mysql_error());
      mysql_select_db($db) or die(mysql_error());
      $dbquery = 'SELECT * FROM timetemp';

      $lines = file('/srv/http/data.txt');
      foreach ($lines as $line_num => $line )
      {
        mysql_query('INSERT INTO $table SET time = '$line_num');
        $sql = 'INSERT INTO $table SET temperature = '$line';
        mysql_query($sql);
      }
      mysql_close(mysql_connect($host, $user, $pass));
    ?>
  </body>
</html>
~
~
```
